SECRET

the runway. Portable reflectors are used as the occasion requires. The field has a direct railway connection with the Brasov-Cighie line, which also connects with the gasoline depot on the cast side of the field.

5. There are 11 buildings at the field, as follows: a one-story house for the main grand and efficies on duty; a three-story betweeks with efficient and enlisted men's messes, culture hell, staff effices and enlisted men's quarters; four concrete hangers, 45 by 100 meters, built originally by the German Air Force and rebuilt by the Soviets ; two new one-story garages, 20 by 40 meters; a new one-story magazine, 22 by 65 meters; a half-finished underground gas storage consisting of three tanks of 60 tons capacity each, with electric pumps. The underground pipeline does not enter the field. There is no ammunition depot at the field. A number of barrack buildings used for ammunition storage are located at the foot of the hill above mentioned, in the forest. The telephone central is in the large berracks on the field. The radio and goniometric stations are in one of the two larger buildings. There is no radar station as far as informent sould ascertain.
